StreetScooter. Next Generation.

With over 80,000,000 kilometres driven (more than 2,000 times around the world) and over 12,000 vehicles sold, the StreetScooter is a veritable player in the light all-electric commercial vehicle segment.** Now we've taken our proven concepts and designs and made them even better for the next generation of StreetScooter users. No matter what industry you work in, you have to give your best every day – and your success depends on having a reliable vehicle.

That's why we've focused on the essentials. You'll find no frills here. StreetScooter offers robust vehicle components that can handle even tough everyday jobs, sophisticated engineering that improves the effectiveness of your fleet, as well as driving comfort and convenience for your drivers – plus an attractive total cost of ownership that's easy on your budget.

Your e-vehicle. Perfectly equipped.

The next generation of StreetScooter vehicles offers a range of features for your safety, comfort and convenience on the job.

Comfort and convenience

- Keyless entry & Keyless start
- Automatic climate control system
- Pre-Conditioning heating and air conditioning
- Heated driver and passenger seats
- Heated windshield and heated side mirrors
- Review camera
- DAB+ Radio
- Bluetooth® hands-free system
- Apple Carplay/Android Auto
- Fast charging at up to 11 kW

Safety

- Driver and passenger side airbags
- Acoustic Vehicle Alerting System (AVAS)
- In-vehicle Automatic Emergency Call system (eCall)

Sophisticated e-mobility. Customized.

Agile, locally emission-free, low-maintenance and economical to maintain: The StreetScooter success models are the optimal solutions for every challenge on the last mile. Free access to green zones, whisper quiet night-time deliveries, low operating and maintenance costs, labor and stress-saving engineering, investment confidence and the good feeling of showing your true colors as an environmentally friendly company. In other words, there are solid reasons for switching your fleet to StreetScooters.

We'll help you with the process! Our comprehensive service package covers everything from an individual needs analysis, through adaptable vehicle configurations that fit your requirements, to a well-engineered charging infrastructure. Need a comprehensive, tailored solution for your fleet management, charging infrastructure and vehicle equipment? Contact us!

Key Facts

Type 2 AC charging system
Up to 11 kW

Charging plug
Type 2

**6-year or up to
120,000 km warranty¹⁾**

** Status as of September 2019

E-fleet necessities. **Ready-to-use infrastructure solutions.**

E-mobility is the key to supply our city centers in the future – it's flexible, cost-effective, and offers the local clean air benefits of zero-emissions. Why wait? Our goal is to offer companies practicable and hands-on solutions for the switch to e-mobility, and made the transition from wanting to doing sooner than most commercial vehicle manufacturers.

If you are planning to switch to e-mobility or to expand your current electric vehicle fleet, benefit from our extensive experience in installing more than 13,500 charging stations.** Our advisors will be happy to assist you. As a general contractor, we can even handle the entire process for you – from planning, through installation to ready-for-use initialization of your individual charging solution.

1) The warranty applies to the lithium-ion high volt deep-cycle battery of a factory-new electric vehicle of the StreetScooter WORK models. The warranty is valid for the first 120,000 kilometers and ends, regardless of actual mileage, no later than six years after the initial delivery or initial registration of the vehicle, whichever comes first. The earlier date in each case shall be decisive. The vehicle and customized truck body are covered by a two-year warranty.
